

WeighPlus™ Crane Scale

Crane Scale with Overload Warning

MAG-MATE®

MG-07C

Designed To Weigh, Plus Warn

The WeighPlus™ crane scale is a programmable, computerized, self-contained, and battery-operated crane scale with overload warning. The scale housing is made of durable stainless steel. All electronics are shock mounted and the recessed display and control area provides additional protection.

The WeighPlus™ crane scale features a multi-colored LED display. The scale will show the weight being lifted in a GREEN background and will flash OVERLOAD in a RED background when the scale detects an overload. Set the scales Working Load Limit (WLL) to match that of the lifting device (magnet, sling, chain, etc.) prior to lifting. The scale will display the weight being lifted and will warn the operator if they exceed the WLL of your lifting device. Example: set the scale to a WLL of 2,500 lbs that matches your lift magnet. Once the lift beings, the screen will flash OVERLOAD, in red, if the weight is over 2,500 lbs. . The load sensor has an accuracy of ±0.2% (0.002) and runs off of standard “D” batteries. A power save setting will put the crane scale into sleep mode when left on and not in use, increasing the operating life of the batteries.

FEATURES:

- Capacities of 5,000 Lbs. and 15,000 Lbs.
- Accurate to ±0.2% (0.002)
- Programmable Working Load Limit (WLL)
- Alarm function
- Power save mode
- Shock mounted electronics
- Uses 4 D-cell batteries, included.
- LCD screen, multi colored
- Large top lift loop for easy crane use
- Zero Function. “Load Tare”. Can zero out weight of lifting device (magnet, chain, sling, etc.)
- Light weight design
- USA M.A.D.E.™
